

Illinois - 2023 Medicare Part D Stand-Alone Prescription Drug Plans (PDP)

Data as of September 6, 2022. Employer sponsored plans (800 series) are excluded. No sanctioned plans in Illinois.

For CY2023, enhanced alternative plans may offer additional cost-sharing reductions in the gap on a sub-set of the formulary drugs, beyond the standard Part D benefit.

Discontinued for 2023: Cigna Essential Rx (\$30.60 monthly) will be ending 12/31/2022 and if beneficiaries do not enroll into another plan, Cigna will auto enroll them into Cigna Extra Rx for \$65.40 monthly premium.

New plans for 2023: Cigna Saver Rx S5617-367 and Mutual of Omaha Rx Essential S7126-119

AE = Basic Part D coverage **EA** = Enhanced: Enhanced plans have a higher actuarial value (percentage of cost covered) **BA** = Basic Alternative

Actuarially equivalent (AE) standard benefits: A Medicare Part D plan that has an annual deductible, the plan may substitute certain cost-sharing requirements in defined standard coverage including tiered structures tied to plan formularies or preferred pharmacies in a plan's network.

Basic alternative (BA) benefits: A Medicare Part D plan that may have a reduced or \$0 deductible, can use tiered co-payments or coinsurance, may have a modification to the initial coverage limit. Remains actuarially equivalent to the standard benefit.

Enhanced alternative (EA) coverage: A Medicare Part D plan whose value exceeds that of the defined standard coverage. The plan design includes the basic prescription drug coverage and has supplemental benefits which may include: a reduction in cost-sharing in the "coverage gap" in addition to the donut discount, a reduction in or elimination of the initial deductible, a reduction in the coinsurance or co-payments applicable during the initial coverage phase, an increase in the initial coverage limit, and/or supplemental drugs.
